IS TO BE GOVERNOR

AFTER MR. PINKHAM

To make the matter stronger, it is reported that the job actually has been effected him by certain powerful influences in Washington who are supposed to hold the right of appointing he Governor of Hawnii—that is, whose recommendation to the President along that line will be accepted.

Fails, However, To Explain Why Act Against Feeding Vagrants Was Not Signed

TAKES MIGHTY RAP AT THE RAPID TRANSIT

Governing Reasons Why Lyman's Walakea Land Measure Was Not Approved

Governor Pinkham yesterday made statement outlining his reasons for failing to approve ten of the sixteen legis-lative bills which went into his pocket-

This is a precedent, for none of his reducessors have condescended here fore to take the public into their outdence, where no confidence was ex-

Out of the whole lot of unfortunates the piece de resistance is S. B. 113, which the Governor does not explain, but promises to do so at some future date, this being the feeding of public avagants at the expense of the Territory. This is the record:

Benate Bill No. 113

An act to amend Act 100 of the session laws of 1915, being an Act to amend Chapter \$5 of the Revised Laws of Hawaii, 1915, relating to immigration, labor and statistics.

Proposing to repeal that section of the immigration laws which allows the commismence, with the advice and approval of the governor, to expend immigration funds in the feeding in digent, suffering and helplem persons.

'The reasons for the nonapproval of this Act will be made public at a future date,' explains the Governor. Home Bill No. 260

'To amend Section 168, R. L. H. 1915 forbidding officers and employes of the Territory, or political subdivisions thereof, to become interested in public contracts.

The resons for the numperoval fire resonance, is shown of the desired by an end Section 188 g. L. H. 1915 for hidding officers and employen of the Territory, or political subdivisions the receival the subject of the serviced Lawrence of the provisions of the provisions the foreign in the feeding in the season lawren of 1915 being an Act to amend Chapter 85 of the Revixed Lawrence of the provisions of the serviced Lawrence Heaville 1915, relating to immigration. Indoor and statistics.

Proposing to repeal that section of the immigration funds in the feeding in digent, suffering and helpton parsons. "The reasons for the nonapproval of the governor, to expend immigration funds in the feeding in digent, suffering and helpton parsons." The reasons for the nonapproval of the governor, to expend immigration funds in the feeding in digent, suffering and helpton parsons. "The reasons for the nonapproval of the provency, to expend immigration funds in the feeding in digent, suffering and helpton parsons." The reasons for the nonapproval of the recording in the feeding in the feed

The veto was enacted because; "Adverne possession cannot now run against the Territory, though it may run in favor of the Territory in certain cases now pending, the Territory's claim rests, among other grounds, upon adverne possession. There is no danger that territorial officials will abuse any equitable cluims, and it should not be shut off arhitrarily."

House Bill No. 285

To amend Act 185 of the session laws of 1915, relating to moving pictures.

The Governor believes in the outdoor treatment and says:

"The city and county, counties and Territory are providing very liberal, wholesame outdoor recreation privileges for the public at large, particularly for children. More than ever are people urged to not only enjoy but benefit by fresh air and exercise in the open. For families of moderate means, and only Sabbath and holidar liberty, Susday afternoon is the only free time and opportunity for every mamber of families. With all the week and Sunday evening theirs for profit, it would seem the proprietors of the movie houses had more than their shure of the time and should be content."

House Bill No. 412

House Bill No. 413

House Bill No. 412

An act regulating the appointment and removal of interpreters of the circuit court of the first judicial circuit. Territory of Hawaii.

This bill provided that circuit court interpreters be appointed by the judges, as at present, and that their term of office embraces the period of their good behavior. It was the intent of the measure to prohibit the removal of interpreters for political reasons only, and it was provided that an interpreter could be removed only when substantial grounds were proven. The measure sought not only to encourage the interpreters to become profictent and take a greater interest in their work, but to keep them out of politics as far as their positions were concerned.

the district of South Hills, County of Harwall.

'The blatory of this deal, as I understand it, is as follows:

'The Walakes Mill Company, Ltd., has been apprehensive that on the expiration of its lease, which involves 6300 seres of case lands and possibly 1600 seres that might be reclaimed, it would lime control of the shore. They therefore consented in the draft of the above ast to try and satisfy prospective homestenders by immediately surrendering 200 seres, as mentioned in the act, in expectation that they in some way might be left in possession of the balance of 4300 seres of case land and the privilege of a long lease on the 1500 seres to be reclaimed.

'There is no guszantee for the government, the homestenders, the public of the Walakes Mill Company, Ltd., under H. R. 41, for the whole lands am under control of Section 73 of the Organic Act. I therefore cannot approve the bill.

corstions and the assignment and transfer of their franchises and property.

Certain corporations, like the Intersal of their franchises and property.

Certain corporations, like the Intersal of the public utilities commission, and property that does not. This bill provided that the corporations might transfer to smaller corporations that property uot under the utilities commission, at the same time virtually retaining control of it.

Wants a Plain Label

control of it.

Wants a Plain Label

"In my opinion this Act should have been catitled 'An Act for the benefit of the Onthe Bailway and Land Company, Ltd., and its stockholders. Its terms and privileges are such as have so practical application to any other sorporation within the Territory. The Inter-Island Steam Navigation Company, Ltd., desied any knowledge of the Act or interest in its enactment.

"This Act is so broad and involved that it would require legal determination in the courts. In fact, it endeavors to afford an opportunity to make sull and void certain laws.

"This Territory has suffered enough from ill-defined frachise rights and privileges granted without a clear conception, in fact absolute ignorance, on the part of the legislature, the approving Governor and the public at large, of the effect of such legislation.

"In seeking in effect special legislation, there can be no legitimate objection on the part of a public service corporation, the number in the Torritory being so limited, to clearly state its object and effects so that the law making healy may know precisely what is expented of it. The attorneys of the Oaku Railway and Land Company. I.td., having stated it was not the intent of that company to put into effect, for a year or two, their application of Act 185, I have concluded to give them an apportunity to secure legislation that would not require possible litigation and that might on all sides be definitely understood, there fore failed to approve the Act."

SULTRY WEATHER HAS

And Leads the Usual Procession Ruth Law Says They Are Slow of Faunal Curiosities For and Lack Tractability of Kapiolani Zoo **British Machines**

Ben Hollinger has some gnu animals the zeo.
Lots of 'on! A traveling menageric Lots of 'cml A traveling menagerie that went through this port yesterday was rifled of its choicast appelment by the inantiable supervisorial zoological city dad who in one stroke made the Kapiolani Park soo one of the most interesting in the esuntry.

In one purchase yesterday he added to the zoo one hundred and five specimens of birds and animals and in two denutions from other enthusiasts he ac-

to Miss Ruth Law, the aviatrice, who returned recently from France and England, where she has been studying the conditions and the equipment of the aviation corps now in service in those countries. Alies Law maintains that this government will have to chain from Great Britain the plans of the battle plance her aviators are now using in order to equip its aviation estrys with machines which will be able to combat with the Germans.

"Not one of the hundreds of airplanes which have been sent from this country to Eagland and France are in use at the front," said Miss Law at the McAlpin Hotel yesterday. "The American atrilanes are used as training mediums only, as they are too slow and lack the, tractability in flying which distinguished the British product. The two airplanes which today rank as the greatest triumphs of the age are the Haviland 4 and the Sopwith Scout and Bonneer. The United States Government for a year has been vanisly trying to get specifications of the Haviland 4. Yet we must have an airplane of this speed and mechanical perfection if our aviation corps is to meet the Germans on an equal toother.

"These machines in use by the Brit." mens of birds and animals and in two donations from other enthusiasts he accured a dozen and a half more.

Pronounced Now

"Daisy" the elephant will probably now be aroused out of the limelight for a while for the pride of yenterday's sellection is a pair of white-tailed game commonly described by automated saturalists as beasts which the Creater made out of the left-over scraps from the yest of creation. At one time thick on the African yeldt and bash, those creatures, which for all their queer make up are graceful and attractive, are fast becoming extinct and are dustined soon to join the American bullale in the museum of faunal curiosities.

onlica.

The gaus still occupy the boxes in which they traveled but a paddock is being built for them as rapidly as possible and they will soon be turned out for the benefit of the public.

They were part of a collection which Ellis Joseph, the animal man whose frequent trips through Honolula with large aggregations of bensis have been a frequent feature of local shipping All the other animals purchased yesterday also came from his collection.

Immisus and Macaws

Hollinger thus added to both his mankey and parrot cages which are now hecoming probably more representative of these two popular families of exhibition animals and birds than any other collection in the United States. Among the monkeys secured yesterday from Joseph was one Entellies monkey, the sacred monkey of India. To the parrots he added six pairs of bare eyed cockstage.

The best part of the collection.

parrots he added six pairs of bare eyed cockstops.

The best part of the collection secured yesterday will go into his bird cages. He has already a half dozen varieties of geese and sow adds to those a pair of magpie geese, of a species which are only half-web-footed; and three spur wingod Seese. Of their near kindred he secured eight pairs of black dusks.

A pair of Australian cranes, called in the Autipodes "native companious," and six pairs of beautiful ibis are added to the cranes and other wading birds already in the cages.

Topknots and Pink Eyes

Doves, pigeons and pheasants are also angmented, Hollinger purchased two pairs of Swinhoe pheasants, six pairs of topknot pigeons, six pairs of Senegal doves, four pairs of pink eyed doves, five pairs of plumbed spenghix pigeons, and five pairs of love birds.

To these Joseph added as complimentary to the soo to which he supolied Dairy, the elephant, the bears and

mentary to the soo to which he sup-plied Daisy, the elephant, the bears and other specimens strendy there, four laughing jackasses which were prompt by accepted to represent the Republican party in the collection as the Kona nightingales in the zoo were long ago elected to represent the Hourbons. Only laughing jackasses are birds, not donk-eys.

laughing jackasses are birds, not donkeys.

A female kangaroo and a pair of wallabies, or small kangaroos, were also purchased. The collection will not cost the city a cent as Höllinger gets private subscriptions for each purchase. In addition to these subjects Richard A. Treat has donated his small and interesting noo to Hollinger's collection, consisting of two spider mankeys, a Teddy bear, a Java mankey, an Indian Bhees mankey, and a large number of cockatoos and other parrots.

Arthur Wall also came on the ante with one Java monkey and so it grows.

HIDES, WET BALTED The following are quotations on feed, f. c. b. Honolulu:

ing.

'These machines in use by the British government attain a speed of 135 miles and land at a speed of thirty miles and land at a speed of thirty miles an hour. In flight they are able to rise more rapidly under more perfect control than even the celebrated Garman Fokker. They excell the Fokker in their ability to be manipulated under the most adverse weather conditions. They can be banked to an angle of 90 degrees instantly, answering to the control at the slightest pressure. The American machines, while combining stability and strength of construction, seek speed and the most necessary pulities of a war plane—climbing ability and a sensitive control. They will not climb rapidly enough for quick maneuvering, and many of our present types of airplanes would be hopelessly outclassed in an encounter with the questly German machines.

''My recent experience in Europe, observing at close range the development of airplanes, astonished me and made me realize what a meager knowledge even our greatest experts have of the development of the airplane by the warring nations. To successfully develop our aviation corps was misst equal me their equal in speed and maneuvering.'

Miss Law yesterday wired to Colone!

Higgs have advanced to 50 cents a dozen but even this price is very low in comparison with the feed bill and a great many people are going out of the huminess. If the producers continue to sell their stock at the present rate it is anfe to say that there will be very few chickons or eggs meat year.

The prices on green vegetables have that from all reports there will be large quantities for sale in the near fathre. Cabbage is still bringing top prices.

Island Irish potatoes are coming in in mange quantities and the quality is better than for asceral years, especially those raised on this island. Sweet pointoes are very scarce. The division would like to hear from all whe have sweet potatoes for sale. Miss Law yesterday wired to Colonel Squire, chief of aviation in Washington, offering her entire services to the government in any capacity it night elect. She hopes to be attached to the active air corps.

grown in Kula and elsewhere in the lalands both for drying and canning if the people would use them. Thirty bags will arrive next week.

and batter is getting more please that there is a good demand for it, there makers should be careful to ask out all the buttermilk as it gives the butter a cheesey taste. Such butter will be sold for cooking purposes and the producer can not expect to get top prices. Put out a first class product and get the best price.

Higgs have advanced to 50 cents a dispensation of field and garden seeds and its now in a position to supply the grow ers with almost any quantity of the standard varieties. This seed was the present rate it will be very like the same. Price lists will be sent to persons applying for the same. Price lists will be nent to persons applying for the same. All orders must be accompanied by post money order of a por accounts will be open.

these raised on this island. Sweet polations are very scarce. The division would like to hear from all who have sweet potatoca for sale.

Probably the best shipment of green peas ever grown in the Islands was received by the division Friday from Kula. They are of the Frince Edward variety and much sweeter than the California peas. Consumers should very tainly use these instead of canned peas.

Large quantities of these peas could be grown in Kula and elsewhere in the

GARDEN SEEDS CAN

Richard H. Trent will be the next Governor of Hawaii, succeeding Lucius E. Pinkham, according to the latest rumor, which bears marks of suthen-icity, that has come from the Coast. Rumors have been many regarding the past several months, and this is the latest. Season of Planting Affects Yield Atest.

Mr. Trent has frequently been suggested for the governorship, but the suggestion was discounted by the fact that he had more than once said he and Quality

could not consider taking the position as the nature of his business and its immediate requirements demanded all Viable garden seeds can be grown n the tropics just as satisfactorily us in the temperate zone. Also, there used be no deterioration in the quality But Mr. Trent went to the mainland for an extensive trip and only recent ty returned. On his heels came the re-port that he had been in consultation with the powers that make territorial Governors and that he had connected to take the job if it were offered to of vegetable varieties if ordinarily careful selections are made.

This is the latest word coming from the Porto Rico experiment station where tests have been under way for a number of years. Porty successive generations of beans, and thirty-two of okra and tomatoes, showed no tendency owards deterioration in quality.

The season of planting, however

REDUCED BY MANURE

Careful experiments conducted by the British board of agriculture show the value of the manure produced by dairy cattle to range from two-thirds of a cent to one and two-thirds cents per gallon of milk produced.

per gallon of milk produced.

The solid manure should be stored in reofed bins, while the liquid manure should be stored in cisterns, the surface covered with crude oil to preven the loss of ammonia. Innoculation of the liquid manure with lactic sold bacteria results in converting the volatile fertilizing ingredients into a non-volatile form. If stable manures are carefully preserved a material reduction in the fertilizer bill can be offected.
